

Subscriber cas card

Subscriber CAS card is a "key" to the scrambled TV content broadcasted by TV operator

Subscriber CAS card is a "key" to the scrambled TV content broadcasted by the TV operator. It allows to manage subscriber's rights and permissions.

The card has its own unique ID which is stored in CAS database. Card must be used with STB (set top box) or CAM (condition access module) which supports actual CAS.

Original cards are preprogrammed to work in actual CAS by manufacturer. The operator programs card (subscriber) ID and operator ID with special programmer (can be included in supply kit). Subscriber ID can be changed later by the operator, operator ID cannot be changed in the future, just in factory conditions. Thus, once programmed, the card belongs to the operator, who has programmed it.

Card has standard CR80 size.

Taking into consideration that we (ROKS PrJSC) are developer and system integrator, also do not stop on our technical growth and improvement, know that view of all our devices and equipment including their technical parameters may be different from pictures presented on website and parameters listed on each device webpage.

Note! All details customer has to confirm in advance during ordering and before payment. Those parameters that were not specified and / or were not agreed while ordering will be implemented as basic at the discretion of the manufacturer. Each our customer has 1.5 year warranty and 7 year aftersales support for whole range of our products.
