

Cas card programmer

CAS card programmer is designed for programming subscriber conditional access cards using CAS software with subscribers database.

CAS card programmer is designed for programming subscriber conditional access cards using CAS software with subscribers database. Blank preprogrammed cards can be used by any operator, but card, once programmed with individual operator ID, can be used with system which has the same CAS operator ID only and cannot be changed.

Programmer connects to PC with USB interface and it is controlled by CAS software. Programmer can be sold with operator license only. It works only with original subscriber CAS cards CR80 format, preprogrammed by the manufacturer.

Programmer has two LED-indicators.

The first indicator signalizes the connection to PC.

The second one signalizes the smart-card connection to programmer.

Taking into consideration that we (ROKS PrJSC) are developer and system integrator, also do not stop on our technical growth and improvement, know that view of all our devices and equipment including their technical parameters may be different from pictures presented on website and parameters listed on each device webpage.

Note! All details customer has to confirm in advance during ordering and before payment. Those parameters that were not specified and / or were not agreed while ordering will be implemented as basic at the discretion of the manufacturer. Each our customer has 1.5 year warranty and 7 year aftersales support for whole range of our products.
